
COLLEGE OF EARTH, OCEAN, AND ATMOSPHERIC SCIENCES

M.S. AND PH.D. IN GEOGRAPHY & GEOSPATIAL SCIENCE

At Oregon State University, students combine geography and geospatial science to analyze and interpret change in the environment and in human societies. These approaches provide tools to address pressing issues affecting communities, nations and the planet. At OSU, you will work with some of the most creative and renowned faculty in the country who study everything from water resources to human refugee dynamics to fisheries.

Areas of interest include:
Geospatial analysis and modeling • Dynamic Earth processes • Water resources and trans-boundary diplomacy • Complex systems • Peace studies • Climate change adaptation • Human migration

Application deadline:
Apply by December 15 for enrollment in the subsequent fall term. For more information, contact gradadvisor@ceoas.oregonstate.edu

Geography & Geospatial Science Graduate Program

Why OSU?

Low debt load: As a result of attending our programs, a majority of graduates report having accrued less than $5k in debt.

Employment: Our students' post-graduation rate of employment is high, and most students find work in their field within six months of completion.

Average time to completion:
M.S.: 2 years
Ph.D.: 5.5 years

No GRE: CEOAS no longer requires the Graduate Record Examination (GRE) test for admission into graduate programs.

Graduate Student Support

Assistantships includes salary, tuition and health insurance.
