# SSCI 202, Principles of Geospatial Intelligence

**Units:** 4

**Term — Day — Time:** Fall, 2025; Tuesday and Thursday, 4:00-5:50pm.

**Locations:** Lecture: KAP 144

**Instructor:** Darren Ruddell, Ph.D. GISP
**Office:** AHF B57F
**Office Hours:** Mondays, 1:30-2:30pm and Tuesdays 11am-12pm PT, and by appointment via email.
**Contact Info:** druddell@usc.edu, 213-740-0521

**Library Help:** Andy Rutkowski
**Office:** LIPA B40-A
**Office Hours**: Thursdays 10am-12pm PT
**Contact Info:** arutkows@usc.edu

**IT Help:** Spatial Support
**Contact Info:** spatial_support@usc.edu

## Course Scope and Purpose

Threats to human security come in many forms – natural disasters, humanitarian crises, environmental risks, public health issues, military operations, terrorist attacks, genocide, political violence, and food/resource accessibility challenges, among others. This class introduces a variety of geospatial technologies with intelligence tools to develop intelligence products that support disaster response, humanitarian relief efforts, and national security. It provides students with the basic geospatial intelligence knowledge and practical skills to assist in informing decision-making in a variety of human security settings. This is a required, standalone course (no pre-requisite required) for the undergraduate minor and the major in Human Security and Geospatial Intelligence.

***Learning Objectives***

On completion of this course, students should be able to:

- Describe the core geospatial intelligence needs related primarily to human security and safety (e.g., disaster response, humanitarian relief efforts, military operations, surveillance, navigation, emergency response, etc…).
- Evaluate the potential impacts of data quality on spatial analysis and decision-making.
- Apply critical thinking, collaboration, and communication skills.
- Complete geospatial workflows to gain insight on data and methods frequently used to support efforts to respond to human security threats.
- Prepare and present intelligence reports using geospatial tools that are tailored to a variety of human security applications.

Students may vary in their competency levels on these abilities. You can expect to acquire these abilities only if you honor all course policies, attend classes regularly, complete all assigned work in good faith and on time, and meet all other course expectations of you as a student.

**Prerequisite(s):** None
**Co-Requisite (s):** None
**Concurrent Enrollment:** None
**Recommended Preparation**: None

## Class Conduct

**Harassment, sexual misconduct, interpersonal violence, and stalking** are not tolerated by the university. All faculty and most staff are considered Responsible Employees by the university and must forward all information they receive about these types of situations to the Title IX Coordinator. The Title IX Coordinator is responsible for assisting students with supportive accommodations, including

This content is protected and may not be shared, uploaded, or distributed.

academic accommodations, as well as investigating these incidents if the reporting student wants an investigation. The Title IX office is also responsible for coordinating supportive measures for transgender and nonbinary students such as faculty notifications, and more. If you need supportive accommodations you may contact the Title IX Coordinator directly (titleix@usc.edu or 213-821-8298) without sharing any personal information with me. If you would like to speak with a confidential counselor, Relationship and Sexual Violence Prevention Services (RSVP) provides 24/7 confidential support for students (213-740-9355 (WELL); press 0 after hours).

**Diversity and Inclusion** – It is my intent that students from all diverse backgrounds and perspectives be well served by this course, that students' learning needs be addressed both in and out of class, and that the diversity that students bring to this class be viewed as a resource, strength, and benefit. It is my intent to present materials and activities that are respectful to everyone, and you are also expected to respect others regardless of their race, ethnicity, gender identity and expressions, cultural beliefs, religion, sexual orientation, national origin, age, abilities, ideas and perspectives, or socioeconomic status. Your suggestions are encouraged and appreciated. Feel free to let me know ways to improve the effectiveness of the course for you personally or for other students.

## Course Structure

The main theoretical concepts of this course are provided through in-class lectures, instructor-guided activities, technical trainings, and directed reading of the textbooks and supplementary readings. Additional readings will be assigned to expand on the text when needed. The course will be introduced on a weekly basis with assignments and course content posted to Brightspace the Friday before a new week begins.

No make-up dates will be offered for missed exams, so mark the appropriate dates on your calendars. If there is legitimate conflict, speak with the course instructor as soon as possible so alternative arrangements can be made.

*Workload* – This is a four credit, one semester course. Students should expect to spend 10-15 hours per week completing the work in this course.

## Technological and Communication Requirements

ArcGIS is provided online via the SSI Server; hence, you do not need to install it on your own computer. Instead, every student must have the following technology requirements:

- A computer with a fast Internet connection
- A functional webcam and microphone for use whenever a presentation or meeting is scheduled
- An up-to-date web browser to access the SSI Server

This content is protected and may not be shared, uploaded, or distributed.

If a student does not have access to any of these, please speak with the instructor at the start of the semester. Also, see the USC ITS Student Toolkit here: https://keepteaching.usc.edu/students/student-toolkit/

A limited number of computers with all the necessary software is available in the SSI Suite (AHF B55) during regular business hours, Monday through Friday 9 am to 5 pm. To reserve a computer, please use this link https://calendly.com/hilaryj-usc/the-ssi-suite-ahf-b55-student-computers. These computers are available to any student in an SSCI or GSEC course and can be used as a resource if you experience difficulties in accessing the SSI server or using the GIS software on your personal computer.

*SSI Server and Tech Support* – This course utilizes the SSI Server which is a virtual desktop giving access to many different professional software. If you are unable to connect to the server or experience any type of technical issues, send an email using your USC account to SSI Tech Support at spatial_support@usc.edu, making sure to copy (cc) me on the email.

*Communications* – All materials to be handed in will be submitted via Brightspace. It is each student's responsibility to stay informed about what is going on in our course. In addition to email about time-sensitive topics, any important announcements will be posted on the News page in Brightspace. Students should read all email sent from Brightspace or from course instructor(s) as soon as possible. Please double-check to be sure that mail sent from both Brightspace and the instructor does not go into junk mail. The instructor will endeavor to respond to all email within 24 hours of receipt, aiming for no more than 72 hours delay. In the rare case that an instructor is off-line for an extended period, an announcement will be posted to the class Brightspace site.

## Required Readings and Supplementary Materials

*Textbooks* – There are four required texts for this course. Some are available online and some are available from the USC Bookstore or online outlets such as Amazon/Georgetown University Press. We encourage you to acquire or purchase these books quickly since you will need these materials from the opening day of class.

- Clark, R. 2020. *Geospatial Intelligence – Origins and Evolution.* Georgetown Washington, DC: University Press (find at: http://press.georgetown.edu/book/georgetown/geospatial-intelligence).
- Anderson, C. 2023. *The Space Economy*. Hoboken, NJ: Wiley.
- NGA (National Geospatial-Intelligence Agency, Office of Geospatial-Intelligence Management). 2018. *National System for Geospatial Intelligence: Geospatial Intelligence (GEOINT) Basic Doctrine.* Washington, DC: National Geospatial-Intelligence Agency Publication No. 1-0 (FREE download at https://www.nga.mil/ProductsServices/Pages/GEOINT-Basic-Doctrine-Publication.aspx)

This content is protected and may not be shared, uploaded, or distributed.

- NRC (National Research Council). 2007. *Successful Response Starts with a Map: Improving Geospatial Support for Disaster Management.* Washington, DC: National Academies Press. (provided by instructor via Brightspace)

These textbooks will be supplemented with a mixture of readings from academic journals, professional reports, and authoritative websites.

*Readings* – The following book chapters and journal articles are tentatively planned for use and will be posted to Brightspace. Additional articles may be added to this list:

- Esri. 2015. Building Safe Communities: An Executive Summary, An Esri White Paper – July 2015, Redlands, CA: Esri Press.
- Esri. 2014. GIS Platform for National Security, An Esri White Paper – July 2014, Redlands, CA: Esri Press.
- Esri. 2012. ArcGIS for Emergency Management, An Esri White Paper – July 2012, Redlands, CA: Esri Press.
- Esri. 2007. GIS in Defense Installation and Environmental Management, Redlands, CA: Esri Press.
- Fleming, S., Jordan, T., Madden, M., Usery, E., and Welch, R. 2009. GIS applications for military operations in coastal zones. *ISPRS Journal of Photogrammetry and Remote Sensing* Volume 64 (2009): 213-222.
- Palka, E.J., Galgano, F.A., and Corson, M.W. 2005. Operation Iraqi Freedom: A Military Geographic Perspective. *Geographical Review* 95: 373-399.
- USGIF. *Building Resilient Communities Through Geospatial Intelligence*. 2018. Reston, VA: United States Geospatial Intelligence Foundation.
- USGIF. *State and Future of GEOINT: 2020.* Reston, VA: United States Geospatial Intelligence Foundation.

## Description and Assessment of Assignments

Your grade in this class will be determined on the basis of several different assessments:

*GEOINT Briefings – 5 worth a total of 5 points (1 point each).* Students will gain experience with intelligence products by sourcing, evaluating, and presenting five GEOINT Briefs over the course of the semester.

*Reading Assignments – 4 worth a total of 20 points (5 points each).* Students will be required to complete four reading assignments comprised of quantitative and/or qualitative techniques to gain insight on the physical and human processes underlying intelligence activities, natural hazards, disasters, and emergency management/safety as well as examine the impact these events have for decision makers.

This content is protected and may not be shared, uploaded, or distributed.

*Technical Trainings – 6 worth a total of 30 points (5 points each).* To demonstrate an understanding of the basic concepts and skills learned in the class, students will complete six technical trainings that will leverage GIS&T software and the key components of a typical geospatial intelligence workflow while integrating key concepts and ideas. These trainings reinforce independent thought and application.

*Written Reports – 2 worth a total of 15 points (7.5 points each).* Two separate writing assignments will be completed for students to gain insight and reflect on various aspects of GEOINT theory, methods, and applications.

*Mid-term Exam – 1 worth 15 points.* The mid-term exam will consist of multiple choice, short answer, and simple problem questions. Students will be expected to take the exam at the indicated time.

*Group Project – 1 worth 15 points.* The group project will afford you the opportunity to demonstrate your ability to identify and rapidly investigate a real-world GEOINT problem using coursework you have completed thus far. You will make use of geospatial data sources and analysis tools and will be required to define a real-world problem, identify key challenges, explore possible solutions, and deliver a recommended solution for a human security need or challenge. The layout and contents of these various components will be tailored to the threat at hand. These human security threats could easily include one or more of the following – natural disasters, humanitarian crises, environmental risks, public health issues, military operations, terrorist attacks, genocide, political violence, and food/resource accessibility challenges – and the various tasks and products would be tailored to the chosen project.

## Grading Breakdown

| **Assignment** | **Number** | **Points each** | **% of Grade** |
|---|---|---|---|
| GEOINT Briefings | 5 | 1 | 5 |
| Reading Assignments | 4 | 5 | 20 |
| Technical Trainings | 6 | 5 | 30 |
| Written Reports | 2 | 7.5 | 15 |
| Mid-term Exam | 1 | 15 | 15 |
| Group Project | 1 | 15 | 15 |
| **TOTAL** | **19** | | **100** |

This content is protected and may not be shared, uploaded, or distributed.

## Grading Scale

Assignments in this and other SSCI courses, are graded on the letter grade scale where A is exemplary, B is very good, C is satisfactory, D is unsatisfactory, and F needs improvement. Final grades use the same letter grade scale. The grading scale follows:

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| A | > 93 points | | B- | 80-82 points | | D+ | 67-69 points |
| A- | 90-92 points | | C+ | 77-79 points | | D | 63-66 points |
| B+ | 87-89 points | | C | 73-76 points | | D- | 60-62 points |
| B | 83-86 points | | C- | 70-72 points | | F | <60 points |

## Assignment Submission Policy

Assignments will be submitted for grading via Brightspace using the due dates specified in the Course Schedule below.

Students are expected to attend and participate in each class session and to complete and upload all assignments by the deadline detailed in the Course Schedule. Late work will be assessed a penalty of 10% per day and zero grades will be assigned for work that is more than four days late.

## SSI Policy on the Creation of Original Work and Use of Generative AI

All students are expected to submit assignments that represent their own original work, and that have been prepared specifically for the course or section for which they have been submitted. Students may not have another person or entity complete any substantive portion of an assignment or reuse work prepare for courses without obtaining written permission from the instructor(s). Developing strong competencies in research, writing, and the technical execution of geospatial technologies are foundational to SSI academic programs that are designed to prepare you for success in the workplace. Therefore, using generative AI tools – unless explicitly specified otherwise – is strictly prohibited in this course, will be identified as plagiarism, and will be reported to the Office of Academic Integrity.

## Grading Timeline

My goal is to provide grading and feedback on each course assignment in time for you to take my feedback into consideration as the course progresses. Generally, this means that you can expect feedback within 1 week after a given assignment's due date.

## Learning Experience Evaluations

Please note Learning Experience Evaluations for the course take place at the end of the

This content is protected and may not be shared, uploaded, or distributed.

semester and are facilitated by the University. These evaluations provide an important review of student experiences in the course.

## Course Content Distribution and Synchronous Session Recordings Policies

USC has policies that prohibit recording and distribution of any synchronous and asynchronous course content outside of the learning environment.

Recording a university class without the express permission of the instructor and announcement to the class, or unless conducted pursuant to an Office of Accessibility Services (OSAS) accommodation. Recording can inhibit free discussion in the future, and thus infringe on the academic freedom of other students as well as the instructor. (Living our Unifying Values: The USC Student Handbook, page 13).

Distribution or use of notes, recordings, exams, or other intellectual property, based on university classes or lectures without the express permission of the instructor for purposed other than individual or group study is prohibited. This includes but is not limited to providing materials for distribution by services publishing course materials. This restriction on unauthorized use also applies to all information, which has been distributed to students or in any way has been displayed for use in relationship to the class, whether obtained in class, via email, on the internet, or via any other media. (Living our Unifying Values: The USC Student Handbook, page 13).

### Course Schedule: A Weekly Breakdown

| Week | Topic | Readings and Assignments | Deliverables and Due Dates |
|---|---|---|---|
| | **Module 1: Introduction to GEOINT** | | |
| **Week 1**<br>8/26 and 8/28 | **Geospatial Intelligence Context**<br>Introduction to the concept of GEOINT, the Intelligence Community, types of intelligence analysis, the players/their typical roles and responsibilities, and the role of GIS in Human Security. | Reading: Esri (2014); Clark (2020) Ch. 1<br>Assigned: Reading Assignment #1 | No deliverables. |
| **Week 2***<br>9/2 & 9/4<br>*Monday, 9/1 is a university holiday | **Basic Roles and Responsibilities**<br>Role of disaster management, humanitarian assistance, surveillance, and navigation in geospatial intelligence plus GEOINT importance to International Relations. | Reading: Esri (2012, 2015); Anderson (2023) Ch. 1; Clark (2020) Ch. 2<br>Assigned: GEOINT Briefing #1<br>Assigned: Technical Training #1 | Submit Reading Assignment #1 no later than 4:00 p.m. on Tuesday, 9/2. |
| | **Module 2: Geography and Geoscience Basics** | | |
| **Week 3**<br>9/9 & 9/11 | **Importance of Physical and Human Geography**<br>Introduction to the ways in which physical and human geography can be used to situate geospatial | Reading: Anderson (2023) Ch. 2; Clark (2020) Ch. 3 & 5<br>Assigned: Reading Assignment #2<br>Assigned: Technical Training | Submit GEOINT Briefing #1 no later than 4:00 p.m. on Tuesday, 9/9 and Technical Training #1 no later than 4:00 |

This content is protected and may not be shared, uploaded, or distributed.

| | | | |
|---|---|---|---|
| | intelligence. Introduction of Esri platforms. | #2 | p.m. on Thursday, 9/11. |
| **Week 4**<br>9/16 &<br>9/18 | **Geospatial Intelligence Building Blocks**<br>Introduction to the ways in which fundamental geographic information science principles and the accompanying geospatial technologies (GIS, GPS, photogrammetry, remote sensing, and sensor networks) have been used for disaster management, humanitarian assistance, and intelligence problem-solving. | Reading: Esri (2007); Anderson (2023) Ch. 3; Clark (2020) Ch. 6; USGIF (2018)<br>Assigned: GEOINT Briefing #2<br>Assigned: Technical Training #3 | Submit Reading Assignment #2 no later than 4:00 p.m. on Tuesday, 9/16 and Technical Training #2 no later than 4:00 p.m. on Thursday, 9/18. |
| | **Module 3: Spatial Data Collection** | | |
| **Week 5**<br>9/23 &<br>9/25 | **Navigation and Space Exploration**<br>Continued discussion of fundamental geographic information science principles and the accompanying geospatial technologies, navigation and space exploration, and intelligence writing are explored. | Reading: Palka et al. (2005); Anderson (2023) Ch. 4; Clark (2020) Ch. 4 & 7<br>Assigned: Reading Assignment #3<br>Assigned: Technical Training #4 | Submit GEOINT Briefing #2 no later than 4:00 p.m. on Tuesday, 9/23 and Technical Training #3 no later than 4:00 p.m. on Thursday, 9/25. |
| **Week 6**<br>9/30 &<br>10/2 | **Navigation and Geolocation**<br>Continued discussion of fundamental geographic information science principles and the accompanying geospatial technologies. Overhead data collection systems are explored. | Reading: NGA (2018) Ch. 2; Anderson (2023) Ch. 5; Clark (2020) Ch. 8 & 9<br>Assigned: GEOINT Briefing #3 | Submit Reading Assignment #3 no later than 4:00 p.m. on Tuesday, 9/30 and Technical Training #4 no later than 4:00 p.m. on Thursday, 10/2. |
| **Week 7***<br>10/7 &<br>10/9<br>*10/9-10/10 is a university holiday | **Midterm Exam**<br>Prepare for and complete Midterm Exam. | | Complete Midterm Exam in class on Tuesday, 10/7. |
| **Week 8**<br>10/14 &<br>10/16 | **Course Check and Spatial Data Collection (Visible)**<br>Methods and approaches for linking legacy geospatial datasets and visible imaging systems with other kinds of information to yield useful spatial intelligence. | Reading: USGIF (2020); Anderson (2023) Ch. 6; Clark (2020) Ch. 10<br>Assigned: Written Report #1<br>Assigned: Group Project Proposal | Submit GEOINT Briefing #3 no later than 4:00 p.m. on Tuesday, 10/14. |
| **Week 9**<br>10/21 &<br>10/23 | **Spatial Data Collection (Spectral Imaging – Radar – LiDAR)**<br>Methods and approaches for collecting and linking evolving sensor suites with other kinds of information to yield useful spatial intelligence. In addition, explore visible and spectral imaging systems. | Reading: Anderson (2023) Ch. 7; Clark (2020) Ch. 11 & 12<br>Assigned: GEOINT Briefing #4<br>Assigned: Technical Training #5 | Submit Written Report #1 no later than 4:00 p.m. on Tuesday, 10/21 and Group Project Proposal no later than 4:00 p.m. on Thursday, 10/23. |

This content is protected and may not be shared, uploaded, or distributed.

| | | | |
|---|---|---|---|
| | **Module 4: Analysis and Visualization** | | |
| **Week 10**<br>10/28 & 10/30 | **GEOINT Analysis**<br>Introduction to the information exploitation process and the ways in which intelligence methodologies can be used to respond to a variety of human security challenges. | Reading: NGA (2018) Ch. 3; Anderson (2023) Ch. 8; Clark (2020) Ch. 13; NRC (2007) Ch. 1-4<br>Assigned: Reading Assignment #4<br>Assigned: Technical Training #6<br>Assigned: Group Project Data Report | Submit GEOINT Briefing #4 no later than 4:00 p.m. on Tuesday, 10/28 and Technical Training #5 no later than 4:00 p.m. on Thursday, 10/30. |
| **Week 11**<br>11/4 & 11/6 | **GEOINT Visualization**<br>Challenges, opportunities, and best practices for visualizing geospatial data and the creation and distribution of intelligence products for actionable information. | Reading: NGA (2018) Ch. 4; Anderson (2023) Ch. 8; Clark (2020) Ch. 14 & 15<br>Assigned: GEOINT Briefing #5 | Submit Reading Assignment #4 no later than 4:00 p.m. on Tuesday, 11/4 and Technical Training #6 no later than 4:00 p.m. on Thursday, 11/6. |
| **Week 12***<br>11/11 & 11/13<br>*Tuesday, 11/11 is a university holiday | **Tradecraft and Intelligence Agencies**<br>The role of tradecraft is reviewed. A discussion of intelligence agencies will also be addressed. | Reading: NGA (2018) Ch. 5; Anderson (2023) Ch. 9; Clark (2020) Ch. 16, 17, & 18 | Submit GEOINT Briefing #5 no later than 4:00 p.m. on Tuesday, 11/11. |
| | **Module 5: Intelligence Products and Future Opportunities** | | |
| **Week 13**<br>11/18 & 11/20 | **Geospatial Intelligence Products and Communication**<br>The role and character of disaster management, humanitarian assistance, and intelligence briefs, imagery and area reports in human security applications by exploring the use of rapidly evolving, interactive, and dynamic decision support products. | Reading: NRC (2007) Ch. 5-6; Anderson (2023) Ch. 10; Clark (2020) Ch. 19<br>Assigned: Written Report #2 | Submit Group Project Data Report no later than 4:00 p.m. on Tuesday, 11/18. |
| **Week 14***<br>11/25 & 11/27<br>*11/26-11/28 is a university holiday | **Group Project and Holiday Break**<br>Discuss progress on group projects in terms of topic of investigation, data sources, analyses, preliminary results, intended intelligence products, etc. | Reading: Fleming et al. (2009) Ch. 5-6; Clark (2020) Ch. 20 | Discuss progress on Group Project in class on Tuesday, 11/26. |
| **Week 15**<br>12/2 & 12/4 | **The Future of GEOINT and Group Presentations**<br>Exploration of how some of the new mobile devices and applications, virtual and augmented reality opportunities, and cartographic representations and visualization | | Submit Group Project no later than 4:00 p.m. on Thursday, 12/4. |

This content is protected and may not be shared, uploaded, or distributed.

| | | | |
|---|---|---|---|
| | techniques might be used to acquire or extract meaning from rich and multi-dimensional datasets in a variety of human security settings. | | |
| **Final Exams** 12/10-17 | **Final Exams** Students submit final assignment of the course. | | Submit Written Report #2 no later than 4:00 p.m. on Thursday, 12/11. |

## Statement on Academic Conduct and Support Systems

### *Academic Integrity*

The University of Southern California is a learning community committed to developing successful scholars and researchers dedicated to the pursuit of knowledge and the dissemination of ideas. Academic misconduct, which includes any act of dishonesty in the production or submission of academic work, comprises the integrity of the person who commits the act and can impugn the perceived integrity of the entire university community. It stands in opposition to the university's mission to research, educate, and contribute productively to our community and the world.

All students are expected to submit assignments that represent their own original work, and that have been prepared specifically for the course or section for which they have been submitted. You may not submit work written by others (including AI generated) or "recycle" work prepared for other courses without obtaining written permission from the instructor(s).

Other violations of academic integrity include, but are not limited to, cheating, plagiarism, fabrication (e.g., falsifying data), collusion, knowingly assisting others in acts of academic dishonesty, and any act that gains or is intended to gain an unfair academic advantage.

The impact of academic dishonesty is far-reaching and is considered a serious offense against the university. All incidences of academic misconduct will be reported to the Office of Academic Integrity and could result in outcomes such as failure on the assignment, failure in the course, suspension, or even expulsion from the university.

For more information about academic integrity see the student handbook or the Office of Academic Integrity's website, and university policies on Research and Scholarship Misconduct.

Please ask your instructor if you are unsure what constitutes unauthorized assistance on an exam or assignment, or what information requires citation and/or attribution.

**Students and Disability Accommodations:**

USC welcomes students with disabilities into all of the University's educational programs. The Office of Student Accessibility Services (OSAS) is responsible for the determination of appropriate accommodations for students who encounter disability-related barriers. Once a student has completed the OSAS process (registration, initial appointment, and submitted documentation) and accommodations are determined to be reasonable and

This content is protected and may not be shared, uploaded, or distributed.

appropriate, a Letter of Accommodation (LOA) will be available to generate for each course. The LOA must be given to each course instructor by the student and followed up with a discussion. This should be done as early in the semester as possible as accommodations are not retroactive. More information can be found at osas.usc.edu. You may contact OSAS at (213) 740-0776 or via email at osasfrontdesk@usc.edu.

**Support Systems:**

*Counseling and Mental Health - (213) 740-9355 – 24/7 on call*

Free and confidential mental health treatment for students, including short-term psychotherapy, group counseling, stress fitness workshops, and crisis intervention.

*988 Suicide and Crisis Lifeline - 988 for both calls and text messages – 24/7 on call*

The 988 Suicide and Crisis Lifeline (formerly known as the National Suicide Prevention Lifeline) provides free and confidential emotional support to people in suicidal crisis or emotional distress 24 hours a day, 7 days a week, across the United States. The Lifeline is comprised of a national network of over 200 local crisis centers, combining custom local care and resources with national standards and best practices. The new, shorter phone number makes it easier for people to remember and access mental health crisis services (though the previous 1 (800) 273-8255 number will continue to function indefinitely) and represents a continued commitment to those in crisis.

*Relationship and Sexual Violence Prevention Services (RSVP) - (213) 740-9355(WELL) – 24/7 on call*

Free and confidential therapy services, workshops, and training for situations related to gender- and power-based harm (including sexual assault, intimate partner violence, and stalking).

*Office for Equity, Equal Opportunity, and Title IX (EEO-TIX) - (213) 740-5086*

Information about how to get help or help someone affected by harassment or discrimination, rights of protected classes, reporting options, and additional resources for students, faculty, staff, visitors, and applicants.

*Reporting Incidents of Bias or Harassment - (213) 740-5086 or (213) 821-8298*

Avenue to report incidents of bias, hate crimes, and microaggressions to the Office for Equity, Equal Opportunity, and Title for appropriate investigation, supportive measures, and response.

*The Office of Student Accessibility Services (OSAS) - (213) 740-0776*

OSAS ensures equal access for students with disabilities through providing academic accommodations and auxiliary aids in accordance with federal laws and university policy.

*USC Campus Support and Intervention - (213) 740-0411*

Assists students and families in resolving complex personal, financial, and academic issues adversely affecting their success as a student.

This content is protected and may not be shared, uploaded, or distributed.

*Diversity, Equity and Inclusion - (213) 740-2101*

Information on events, programs and training, the Provost's Diversity and Inclusion Council, Diversity Liaisons for each academic school, chronology, participation, and various resources for students.

*USC Emergency - UPC: (213) 740-4321, HSC: (323) 442-1000 – 24/7 on call*

Emergency assistance and avenue to report a crime. Latest updates regarding safety, including ways in which instruction will be continued if an officially declared emergency makes travel to campus infeasible.

*USC Department of Public Safety - UPC: (213) 740-6000, HSC: (323) 442-1200 – 24/7 on call*

Non-emergency assistance or information.

*Office of the Ombuds - (213) 821-9556 (UPC) / (323-442-0382 (HSC)*

A safe and confidential place to share your USC-related issues with a University Ombuds who will work with you to explore options or paths to manage your concern.

*Occupational Therapy Faculty Practice - (323) 442-2850 or* otfp@med.usc.edu

Confidential Lifestyle Redesign services for USC students to support health promoting habits and routines that enhance quality of life and academic performance.

This content is protected and may not be shared, uploaded, or distributed.
